ITPIE
ATLAS

OPERATOR-BUILT · DOW-PROVEN

FORMERLY ITPIE OPS

INVENTORY + MAPPING

See and find every device. Anywhere, on a dime.

Atlas finds and maps every device on your network and keeps that picture current. You can't secure or automate what you haven't found.

COMMON OPERATING PICTURE + DISCOVERED TOPOLOGY

WITHOUT ITPIE	WITH ITPIE ATLAS
The **inventory is a spreadsheet** someone updated last year, and the map is three refreshes out of date	**Live discovery** across 27 protocols, nearly 3,000 devices supported, and AI that identifies new equipment
A **base can't migrate** until someone walks it and writes down what's there	**Full remote inventory** and live topology maps, so each site needs one visit
A **compromised device** moves, and nobody can say where it has been	**Device history by MAC and IP**, so you see where a device is now and where it has been

THE OUTCOME

BEFORE

~~Spreadsheet inventory~~

WITH ITPIE ATLAS

A live map you can trust.

sales@itpie.com

ITPIE ATLAS

Know your IT. Every device, every link.

Discover everything on the wire
27 protocol collectors and nearly 3,000 devices supported. AI identifies new equipment on its own. No templates to build.

Map how it all connects
Topology and zone views built from what it finds, current every time you open them.

Track any device, anywhere
ARP collection keeps every device's location and history current, by MAC and IP.

Feed everything else
Serves a trusted inventory to Axiom and the tools you already run, over a REST API.

PROGRAMS + USE CASES

Network modernization NETMOD · COMPMOD · CUTOVERS	Survey a base before cutover and hand the migration team an inventory they can trust.
Defensive cyber operations TRACE · ISOLATE · RESPOND	When a device is compromised, see where it is now and everywhere it has been.
Disconnected + classified networks AIR-GAPPED · CLASSIFIED · DDIL	Run Surveyor on a desktop, with no server, on networks with no outside connection.

BETTER TOGETHER · ATLAS, AXIOM + FULCRUM RUN AS ONE ON POLARIS

+ Axiom
Discovered state syncs into the source of truth, so config runs against what's really there.

+ Fulcrum
Ask about any device, site or connection in plain language.

+ Polaris
One sign-in, and every deployable product pre-integrated on one hardened appliance.

HOW IT DEPLOYS

- Surveyor (desktop)
- Atlas Agent (remote)
- Enduring ops build
- Outpost OVA · planned

HOW IT'S BOUGHT

- Standalone or in the suite
- Subscription
- On-prem or air-gapped

DOW-PROVEN · ARMY NETMOD RAN ON ITPIE

85,000+ SWITCHES

115+ INSTALLATIONS

$12M+ SAVED

Zero DISRUPTIONS
